

# Important Information for BSN Applicants

4 March 2011

## Statistics Requirement

Please note that a change will be made to the Nursing Prerequisite Course Equivalents sheet related to the statistics requirement for students who take those courses in Fall 2010 or later. Due to program changes at Cuyahoga Community College, MATH 1410 will now meet the statistics requirement. All other information on that sheet is correct.

## Reference Forms

The reference forms have been changed for the Freshman Entry Pathway, Basic, and Accelerated BSN programs. This affects students who are applying for *all* upcoming and future deadlines. Students should make sure they are using the new reference forms. The new forms are in the application packets on the School of Nursing's website. *Students who are reapplying for a program will need to submit new reference forms.*

These are the upcoming deadlines affected by this change:

Freshman Entry Pathway	November 15, 2010
Basic BSN Early Decision	January 1, 2011
Basic BSN Regular Decision	March 1, 2011
Accelerated BSN	June 1, 2011

## Minimum Number of Science Prerequisites

Accelerated BSN applicants are no longer required to have successfully completed three (3) of the five (5) science prerequisite courses at the time of application. They must have successfully completed two (2). This affects students who are applying for the upcoming (June 1, 2011) deadline for the class which begins January 2012.

## Age Limit on Science Prerequisites for Basic BSN and Accelerated BSN Applicants

Effective Fall 2012, science prerequisite courses may be no more than 10 years old at the application deadline. This affects students who are applying for classes which start in Fall 2012 or later. (Note, for the Accelerated BSN program, the first class affected is the one which begins January 2013.) There is no age limit on the science prerequisites for RN to BSN applicants.
